EDUCATION

Diploma in Software Engineering

Sentral Digital College Kuala Lumpur (Brickfield, Kuala Lumpur)

2024 - 2026

Sijil Pelajaran Malaysia (SPM)

SMK Gemas (Gemas, Negeri Sembilan)

Completed: 2024

PROJECTS

AI Scam Detector (Python, Machine Learning, SQL)

Developed an AI-based system to detect scam messages, phishing links, and suspicious online activities using machine learning techniques. Improved user safety by identifying potential fraud in real time.

Student Feedback System (HTML, CSS, MySQL)

Designed and developed a web-based student feedback system that allows students to submit feedback on lecturers, courses, and campus services. It included secure login, data management, and report generation features.

SKILLS

Python Programming

SQL Programming

Web Development (HTML)

Excel

Problem-solving

Machine learning basics

ADDITIONAL

Final Year Project selected as
People's Choice Project

Languages: English, Malay, Tamil

Available for internship
immediately

Strong interest in Software
Development and IT Support
